

Loccioni Leaf Lab

Rosora, Ancône - Italy

THE PROJECT

In 2008, the Loccioni Group, a leading developer of automatic measuring and quality control systems, launched the "Leaf Community" project: a dynamic and open laboratory aimed at addressing sustainability challenges and representing a meeting venue between companies, organizations and institutions.

The Leaf Lab, the first smart building with an A+ energy efficiency rating, houses both office and production areas. The lab blends seamlessly into its surrounding environment and is capable of intelligently managing energy and IT flows, so that the renewable energy is shared with the Leaf Community's other buildings.

THE CUSTOMER'S REQUIREMENTS

Suspended ceilings offering easy access to the plenum in the office areas to conceal the service installations, while bringing style and dimensional stability.

OUR RESPONSE

Accessible Eurocoustic Minerval® E 15-edge suspended ceiling system, made of rigid stone wool self-supporting panels offering easy installation and a stylish finish.

MINERVAL® E 15
